

Table S3. Post-defeat parameter effect sizes (susceptible vs resilient)

Parameter	Susceptible Mean (SD)	Resilient Mean (SD)	Cohen's d
Shelter Preference	4.165 (3.461)	0.430 (0.276)	1.52
Identity Threshold	0.301 (0.305)	0.608 (0.118)	-1.33
Sensory Precision	0.641 (0.019)	0.674 (0.041)	-1.05
Threat Aversion	0.926 (0.485)	0.542 (0.268)	0.98
Motor Inertia	1.562 (0.419)	1.742 (0.906)	-0.26

Cohen's d computed with pooled SD. Susceptible: n=3 (m14, m24, m26); Resilient: n=3 (m16, m17, m23). NaN corrections applied: k_threat → 0.85 (m17 def3), sensory_prec_slope → 0.63 (m24, m26 def3).
